goodnest
Pitch Deck

By Siona Heritage and Alex Wanklyn

Unravelling investing for beginners and making your financial future clear.

66% of men own stocks and shares, whilst 49% of women do.

In America, 70% of white people have investments, followed by 51% of black people and 38% of Hispanic people.

We believe investment is for everyone.

Why GoodNest?

As students, we know the cost-of-living crisis firsthand. We recognise that financial methods can be **life-changing** in the long-term – and are **often completely unrecognised by many people.**

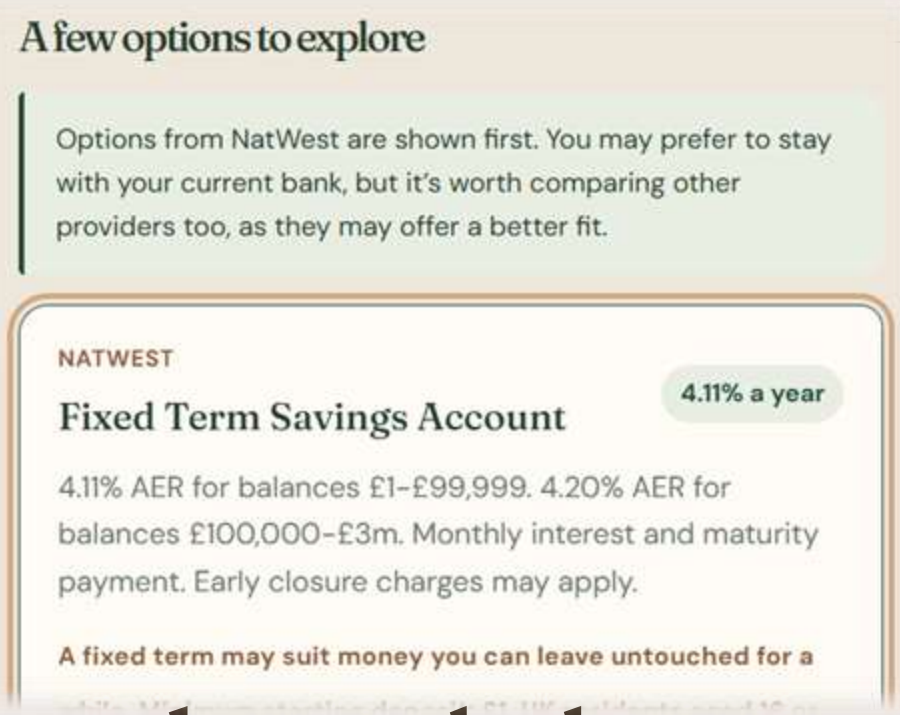

We know that time in the **market beats timing the market,** and we want to zero in on this idea in our product.

How have we promoted financial inclusion?

AI allows us to **collate, simplify and present** the extensive number of **available investment options** to those who may not have had access or exposure to financial literacy due to their socioeconomic standing.

We have built an **accessible, educational tool** built for those of all ages to enjoy investing in their future, **to grow their savings.**

* By taking the **user's priorities** into account, we use **AI-driven selection** to determine savings accounts across banks that **suit their needs** the most.

How do we help promote long-term financial resilience?

Growth strategy

Expand

Direct outreach to people who need it (on-campus campaign)

Explore

Research other pain points due to cost of living

Enhance

Ensure a tailored and user-focused experience

GoodNest aims to take the mystery out of investing and encourage people to **take control of their future sooner.**

We use a combination of **AI-guided chat and recommendations** to offer suggestions of how people can **reduce their outgoings** and save effectively for their future.

We know that esoteric descriptions and lack of clearly available information makes it harder for people to begin investing, we want to help close the gap by making information easily accessible to all.

Conclusion

Thank you

GoodNest
